The Intermac Waterjet

Combining productivity,
versatility and technology

Intermac's profound knowledge of the needs in the optimisation process of glass cutting has brought about the creation of a system that is simple to use, with reduced maintenance and high productivity. With the InterMac Primus solution, there is the combination of productivity and versatility with waterjet technology secured with the reliability and ease of use of an InterMac solution.

*Denotes: optional extra, does not come standard with machine
